Tapco

Topsheet (the new generation of hard PVC wall coverings) can be used on smooth or uneven surfaces, and due to the lack of construction materials, it is the best and most suitable wall covering for interior decoration repairs and renovations. Also, in newly built structures, it is possible to use topsheet wall covering immediately after the building's hardening stage and without the need to do joinery. The very high useful life of topsheet wall coverings eliminates the need to spend money on repairs and renovation of interior decoration.

Topsheet hard PVC wall covering sheets are produced with a new development in the wall covering industry and with various designs of wood, stone and wallpaper in matte and glossy form. These sheets are the best solution for carpentry in residential, office and commercial, medical and sanitary environments, hotels, ships, etc.

Waterproof: This product is made entirely of PVC and is completely waterproof, so it is a very suitable alternative for wall coverings in wet environments such as bathrooms, toilets, and kitchens.

Antibacterial properties: The use of antibacterial substances in the production of this product allows it to be used in treatment and pollution-sensitive places. Antibacterial properties and ability to wash Tapco wall coverings with disinfectants have caused them to use these wall coverings in medical centers.

Self-extinguishing: Topsheet with a low combustion coefficient, is not flammable and has a high resistance to heat.

Light weight: Topsheet wall coverings are a very suitable alternative to stone inside the building. Due to its light weight and high strength, it is very cost-effective in terms of structural calculations and moving the product from the factory to the installation site is done easily and at a low cost.

Impact resistance: Due to the use of hard PVC and impact modifier materials in the formulation of this product, it is classified as Rigid PVC products, which has a very hard and resistant surface and is highly resistant to impact.

Sound and heat insulation: Due to the use of PVC material and special additives, the topsheet product is very suitable for sound and heat insulation, based on the results of standard tests conducted on the product, the reduction of sound and heat transmission is up to %30.

Fast, easy and clean installation: The installation time of this product is very short due to its large dimensions and lightness, and it helps significantly in styling and construction. Also, in terms of using special adhesives, the installation of the product is done without the use of conventional construction materials, and in a way, the installation of the product is Clean To Install.

Long service life: This product is produced using materials resistant to corrosion and decay, so it has a very long service life. Also, the topsheet product has a 0-year warranty.

Color stability: the use of resistant and color protective material in topsheet products has made this product have a very long color stability.

Anti-insect: PVC wallcovering is completely anti-insect and banana animals and these animals cannot cause any damage to this product.

Standard of sheets suitable for wall covering:

sheet width: 122-120 cm

Sheet height: 280 cm (variable according to customer needs)

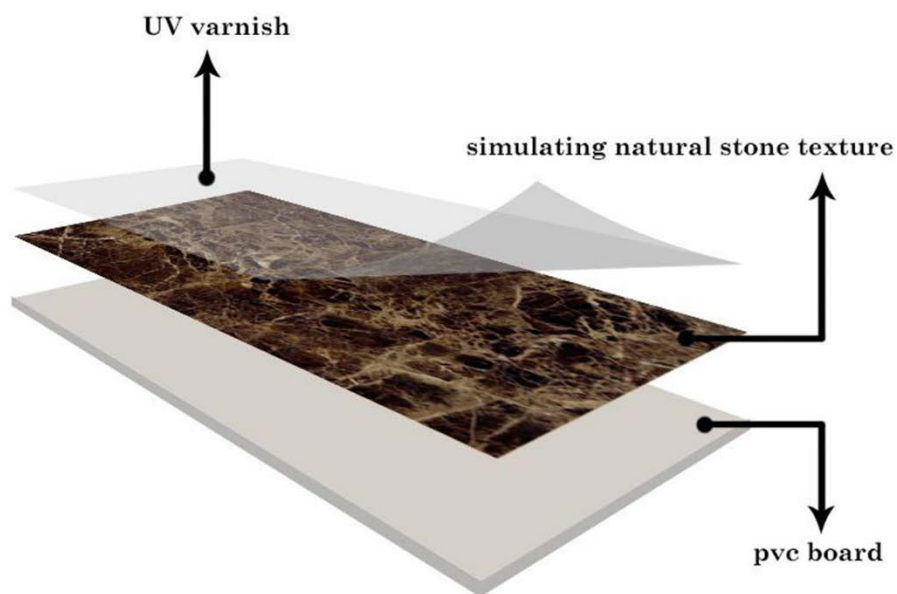

Sheet thickness: 3.8-3.6 mm (production capacity between 2 and 5 mm)

Sheet density: 1800 kg/m³

Sheet weight: 7-6 kg per square meter

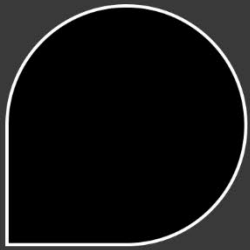

Flammability: self-extinguishing class B2 - based on DIN4102 standard

Water absorption: Zero - according to the standard

Pak Choob

Pak Choob Company is one of the highest quality suppliers of MDF sheets among MDF manufacturing companies, which started its work from a small workshop in 1374 and with the praiseworthy efforts of the managers and employees of the company, it was able to open its factory in Khuzestan province in 1383 and officially started its industrial and mechanized production. Pak Choob brand is a reputable and international brand that is also exported to neighbors. High quality Pak Choob MDF and various coatings in different designs and colors (simple, metallic, wood design and special) makes Pak Choob MDF very distinctive and unique in its kind in Iran.

Pak Choob MDF is produced in the dimensions of 1.83m × 3.66m.

The thickness of Pak Choob MDF is 16mm.

The number of sheets in a pallet is 32 sheets.

The finish of MDF sheets is matte, glossy, snowy and soapy.

The thickness of colored MDF sheets is 16 mm, but according to the request of valuable customers, they are custom-made in thicknesses of 8 and 25 mm.

Pak Choob high gloss is produced in the dimensions of 1.22m × 2.80m.

The thickness of Pak Choob high gloss is 16mm.

The number of sheets in a pallet is 26 sheets.

The finish of the high gloss sheets is glossy, matte, concrete design and embossed.

Pak Choob MDF sheet has a standard of resistance to cold liquids.

In MDF sheet, wood does not change color over time, which increases the lifespan of these sheets.

The edges of the MDF sheet are seamless wood, which prevents water penetration.

Pak Choob sheet is resistant to hardness.

Pak Choob MDF has standard dry heat resistance.
